
ASSESSMENT TEST

Student:

Date:

1. Where do we find the highest atmospheric pressure?
 - a. On the mountain
 - b. Everywhere is the same
 - c. At the seaside
 - d. I don't know
2. The instrument that we use to measure the atmospheric pressure is:
 - a. Anemometer
 - b. Barometer
 - c. Thermometer
 - d. Dynamometer
3. Air masses moves from:
 - a. Low pressure to high pressure
 - b. I don't know
 - c. They don't move
 - d. High pressure to low pressure
4. *Transform FAST a speed of 10 knots in m/s and km/h:
 - a. 5.14m/s and 18.5km/h
 - b. 18m/s and 32km/h
 - c. I can't
 - d. 5m/s and 20km/h
5. Waves are formed by the wind by:
 - a. Pressure
 - b. Friction
 - c. Gravitation
 - d. Attraction
6. The water particles movement inside waves is:
 - a. Translation
 - b. Oscillation
 - c. Rotation
 - d. Perturbation
7. Besides wind waves, also exists:
 - a. waves created by tides
 - b. waves created by earthquakes
 - c. waves created by ships
 - d. waves created by volcanoes

**For computations you can use the right side of the paper.*
